Subject: Microsoft Settlement

Hello,

I am a student at Stony Brook University and is currently seeking acceptance into the Computer Science Major. I have been reading about the "final judgment" in the Microsoft Case, and I feel that Microsoft is a monopoly. Almost every PC on the planet has Microsoft as their operating system, and I feel that other smaller companies with better software and new ideas should get the chance to promote their company. Therefore, I feel that the Supreme Court's decision to control the promotion and use of Microsoft programs and putting strict conditions on the licensing rights of Microsoft to other companies was the right thing to do. Even though just like many other people around the world, I also use a Windows operating system and will have to get to know the new operating systems that will be coming out after this decision is made final.

P.S. Thank you for letting our voices be heard in this decision.
